

Assignment-2

Create MFA for authentication.

1. Log into AWS account and go to security credentials.

2. Add MFA device by clicking on 'Assign MFA device'.

3. Enter a desired device name, MFA device and then click on 'Next'.

The screenshot shows the AWS IAM console 'Assign MFA device' page. The breadcrumb trail is IAM > Security credentials > Assign MFA device. The page is divided into two main sections: 'MFA device name' and 'MFA device'. In the 'MFA device name' section, there is a text input field containing 'Avinaba@01' and a note: 'This name will be used within the identifying ARN for this device. Maximum 64 characters. Valid characters: A-Z, a-z, 0-9, and +, =, ., @, _ (hyphen)'. In the 'MFA device' section, under 'Device options', there are two radio buttons. The first option, 'Passkey or security key', is selected and includes an icon of a person and a key. The second option, 'Authenticator app', is unselected and includes an icon of a smartphone. The bottom of the page shows a Windows taskbar with various application icons and a system clock showing 09:21 PM on 19-02-2025.

4. Enter code using authenticator app and click on 'Add MFA' to complete the process.

The screenshot shows the second step of the 'Assign MFA device' process. The breadcrumb trail is IAM > Security credentials > Assign MFA device. The page is divided into three numbered steps. Step 1 is 'Install a compatible application such as Google Authenticator, Duo Mobile, or Authy app on your mobile device or computer.' Step 2 is 'Open your authenticator app, choose Show QR code on this page, then use the app to scan the code. Alternatively, you can type a secret key.' It features a large QR code and a link 'Show secret key'. Step 3 is 'Type two consecutive MFA codes below'. It has two input fields: the first contains '222779' and the second contains '104261'. At the bottom, there are three buttons: 'Cancel', 'Previous', and 'Add MFA'. The bottom of the page shows a Windows taskbar with various application icons and a system clock showing 09:23 PM on 19-02-2025.

5. MFA device assigned successfully.
